

## CONTENTS

• Hospital bed ( A )	P5 ~ P13
• Hospital bed ( B )	P14 ~ P21
• Household, old-age nursing bed	P22 ~ P24
• Maternal and child hospital bed	P25 ~ P27
• The orthopaedic hospital bed	P28 ~ P30
• Medical car frame cabinet series	P31 ~ P33
• Infusion accompanying chair	P34 ~ P35
• Auxiliary equipment and accessories	P36
• The wheelchair	P37 ~ P39
• Anti bedsore air mattress	P40 ~ P43
• Lumbar support belt	P44 ~ P45
• Medical cushion Self-heating protector	P46
• Cervical vertebra tractor	P47
• Walking aids	P48

**Medical bed series**

Love to caress Care with love

Hospital bed (A)

A01 ABS four-crank lifting hospital bed

Name	Full length	Full width	Height of the bed surface	Tilt angle
ABS four-crank lifting hospital bed	2200 mm	1040 mm	420-650 mm	15°
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
2030 mm	0-75°	0-45°	≥250kg	900 mm

- Product characteristics:**  
**Head of bed, bed tail:** advanced engineering plastic blow molding  
**Bed surface composition:** using high quality cold rolled steel plate  
**Barrier:** ABS damping lift rails  
**In control:** 125mm Deluxe caster brake mute casters  
**Handle:** ABS folding hidden handle  
**Optional:** IV pole, drainage hook, debris rack  
**Bearing:** bearing more than 250kg

## ABS three-crank lifting hospital bed

Name		Full length	Full width	Height of the bed surface
ABS three-crank lifting hospital bed		2200 mm	1040 mm	420-680 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
2030 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding  
**Constitution of bed surface:** Made of high quality cold-rolled steel plate stamping molding whole

**Guardrail:** ABS pp damping lifting guardrails

**Casters:** 125mm Luxurious central brake central control silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A02-4 ABS three-crank lifting hospital bed

Name	Model	Full length	Full width	Height of the bed surface
ABS three-crank lifting hospital bed	A02-4	2200 mm	960 mm	250-530 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
2030 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled steel plate stamping molding whole

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious central brake central control silent casters

**Cranks:** Stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## ABS three-function lifting hospital bed

Product Name	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS three-function lifting hospital bed	2200 mm	960 mm	420-680 mm	2030 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled steel plate stamping molding whole

**Guardrail:** Stainless steel column plus five column column (or six) aluminum guardrail

**Casters:** 125mm Luxurious central brake central control silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** Infusion stand, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A03 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A03	2200 mm	930 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious central brake central control silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** Infusion stand, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## A03-1 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A03-1	2200 mm	930 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** Luxurious central control side brake caster

**Cranks:** ABS fold hidden hand crank

**Optional:** Infusion stand, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## A03-2 ABS three-crank lifting hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS three-crank lifting hospital bed	A03-2	2200 mm	960 mm	420-680 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** Luxurious both-side silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## A03-3 ABS three-crank lifting hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS three-crank lifting hospital bed	A03-3	2090 mm	960 mm	420-680 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** Luxurious both-side silent casters

**Cranks:** Luxurious ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

A04 ABS two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
ABS two-crank hospital bed	A04	2200 mm	960 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
2050 mm	0~75°	0~45°	≥250kg	900 mm

- Product features:**
- Head of bed、end of bed: Advanced engineering plastic blow molding
  - Constitution of bed surface: Made of high quality cold-rolled whole steel plate stamping molding
  - Guardrail: Stainless steel column plus five column (or six) aluminum alloy guardrail
  - Casters: 125mm Luxurious silent casters
  - Cranks: ABS fold hidden hand crank
  - Optional: IV pole, drainage hook, shelf
  - Load bearing: Load bearing≥250kg

Back lift

Leg lift

Back and leg lift together

## A04-1 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A04-1	2200 mm	1040 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled steel plate stamping molding whole

**Guardrail:** ABS pp damping lifting guardrails

**Casters:** 125mm Luxurious central brake central control silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## A05-2 ABS one-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS one-crank hospital bed	A05-2	2190 mm	960 mm	500 mm	2040 mm	0-75°	/	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Head of bed, end of bed: Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious central brake central control silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## ABS one-crank hospital bed

Product Name	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS one-crank hospital bed	2200 mm	1040 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Head of bed, end of bed: Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** ABS pp damping lifting guardrails

**Casters:** 125mm Luxurious silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf, tilting table

**Load bearing:** Load bearing≥250kg

A05

A05-1

## A06 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A06	2200 mm	960 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf, table

**Load bearing:** Load bearing ≥250kg

## A06-1 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A06-1	2200 mm	960 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** ABS and stainless steel compound

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** Optional available

**Cranks:** Stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A07 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A07	2090 mm	1040 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** ABS pp damping lifting guardrails

**Casters:** Luxurious central control side brake caster

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A08 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A08	2090 mm	960 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** Stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A08-1 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A08-1	2090 mm	1040 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** ABS damping lifting guardrail, rotary table

**Casters:** 125mm Luxurious silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A09 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A09	2090 mm	960 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** Stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A10 ABS one-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS one-crank hospital bed	A10	2090 mm	960 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm luxurious silent casters

**Cranks:** Stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## A11 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A11	2200 mm	1040 mm	500 mm	2030 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** ABS and stainless steel compound

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** ABS damping lifting guardrail, rotary table

**Casters:** 125mm luxurious silent casters

**Cranks:** ABS fold hidden hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

A09-1 two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
two-crank hospital bed	A09-1	2090 mm	1060 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	0-45°	≥250kg	1000 mm

**Product features:**  
**Head of bed、end of bed:** Made of high quality cold-rolled whole steel plate stamping molding  
**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding  
**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail  
**Casters:** 125mm Luxurious silent casters  
**Cranks:** ABS fold hidden hand crank  
**Optional:** IV pole, drainage hook, shelf  
**Load bearing:** Load bearing≥250kg

## ABS two-crank hospital bed

Name	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS two-crank hospital bed	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding  
**Constitution of bed surface:** C type punching strip  
**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail  
**Casters:** Optional available  
**Cranks:** Stainless steel hand crank  
**Optional:** IV pole, drainage hook, shelf  
**Load bearing:** Load bearing ≥250kg

## B12 ABS two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS two-crank hospital bed	B12	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding  
**Constitution of bed surface:** 20\*40mm square tube surface  
**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail  
**Casters:** 125mm Luxurious silent casters  
**Cranks:** Stainless steel hand crank  
**Optional:** IV pole, drainage hook, shelf  
**Load bearing:** Load bearing ≥250kg

## B14 ABS two-crank hospital bed with toilet pot (pull and push)

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS two-crank hospital bed with toilet pot (pull and push)	B14	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding  
**Constitution of bed surface:** 20 \* 40mm square tube bed, with quick push and pull hole  
**Guardrail:** Stainless steel column plus five column(or six) aluminum alloy guardrail  
**Casters:** 125mm luxurious silend casters  
**Cranks:** Stainless steel hand crank  
**Optional:** IV pole, drainage hook, shelf  
**Load bearing:** Load bearing ≥250kg

## B05 Stainless steel two-crank hospital bed with bedpan

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Stainless steel two-crank hospital bed with bedpan	B05	2030 mm	960 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

Head of bed, end of bed: φ38mm stainless steel head of bed

Constitution of bed surface: C model punching strip

Guardrail: Optional Aluminum Alloy guardrail, stainless steel guardrail, ordinary guardrail

Casters: Optional

Cranks: Ordinary steel folding hand crank

Optional: IV pole, drainage hook, shelf

Load bearing: Load bearing ≥250kg

Overall weight:

Package Size:

## B05-1 ABS two-crank hospital bed with bedpan

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS two-crank hospital bed with bedpan	B05-1	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

Head of bed, end of bed: Advanced engineering plastic blow molding

Constitution of bed surface: C-punching slats, with hole of bedpan

Guardrail: Stainless steel column plus five column (or six) aluminum alloy guardrail

Casters: 125mm luxury silent casters

Cranks: Ordinary steel folding hand crank

Optional: IV pole, drainage hook, shelf

Load bearing: Load bearing ≥250kg

## ABS one-crank hospital bed

Name	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS one-crank hospital bed	2090 mm	900 mm	500 mm	1950 mm	0-75°	/	≥250kg	900 mm

### Product features:

Head of bed, end of bed: Advanced engineering plastic blow molding

Constitution of bed surface: C type punching strip

Guardrail: Optional Aluminum Alloy guardrail, stainless steel guardrail, ordinary guardrail

Casters: Optional

Cranks: Ordinary steel folding hand crank

Optional: IV pole, drainage hook, shelf

Load bearing: Load bearing ≥250kg

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS one-crank hospital bed with bedpan	B03-1	2090 mm	900 mm	500 mm	1950 mm	0-75°	/	≥250kg	900 mm

### Product features:

Head of bed, end of bed: Advanced engineering plastic blow molding

Constitution of bed surface: C-punching slats, with hole of bedpan

Guardrail: Stainless steel column plus five column (or six) aluminum alloy guardrail

Casters: 125mm luxury silent casters

Cranks: Ordinary steel folding hand crank

Optional: IV pole, drainage hook, shelf

Load bearing: Load bearing ≥250kg

## ABS one-crank hospital bed

Name	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS one-crank hospital bed	2090 mm	900 mm	500 mm	1950 mm	0-75°	/	≥250kg	900 mm

### Product features:

Head of bed, end of bed: Advanced engineering plastic blow molding

Constitution of bed surface: 20\*40mm square tube surface

Guardrail: Stainless steel column plus five column (or six) aluminum alloy guardrail

Casters: 125mm Luxurious silent casters

Cranks: Ordinary steel folding hand crank

Optional: Infusion stand, drainage hook, shelf

Load bearing: Load bearing ≥250kg

### B04-1 Stainless steel two-handle manual bed

Name	Model	Full length	Full width	Height of the bed surface
stainless steel two-handle manual bed	B04-1	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	0-45°	≥250kg	900 mm

### B11-1 Stainless steel one-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Stainless steel one-crank hospital bed	B11-1	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	/	≥250kg	900 mm

### B12-1 Stainless two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Stainless two-crank hospital bed	B12-1	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	0-45°	≥250kg	900 mm

### B01-1 Normal flat hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Normal flat hospital bed	B01-1	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	/	/	≥250kg	900 mm

### B02-1 Stainless steel one-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Stainless steel one-crank hospital bed	B02-1	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	/	≥250kg	900 mm

### B11-2 Stainless steel General flat hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Stainless steel General flat hospital bed	B11-2	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	/	/	≥250kg	900 mm

## B03 Normal one-crank hospital bed with bedpan

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Normal one-crank hospital bed with bedpan	B03	2030 mm	900 mm	500 mm	1950 mm	0-75°	/	≥250kg	900 mm

### Product features:

Head of bed, end of bed: φ38mm ordinary steel pipe coating head of bed

Constitution of bed surface: C type punching strip

Guardrail: optional available aluminum alloy guardrail, stainless steel guardrail, ordinary guardrail

Casters: optional available

Cranks: stainless steel folding hand crank

Optional: IV pole, drainage hook, shelf

Load bearing: Load bearing ≥250kg

## B01 Normal flat hospital bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Normal flat hospital bed	B01	2030 mm	900 mm	500 mm	1950 mm	/	/	≥250kg	900 mm

### Product features:

Head of bed, end of bed: φ38mm Ordinary steel sp ray bedside

Constitution of bed surface: C model punching strip

Guardrail: Optional Aluminum Alloy guardrail, stainless steel guardrail, ordinary guardrail

Casters: Optional

Cranks: /

Optional: Infusion stand, drainage hook, shelf

Load bearing: Load bearing ≥250kg

## B04 Normal two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Normal two-crank hospital bed	B04	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	0-45°	≥250kg	900 mm

## B02 Normal one-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Normal one-crank hospital bed	B02	2030 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	/	≥250kg	900 mm

## B05 Normal two-crank hospital bed with bedpan

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
Normal two-crank hospital bed with bedpan	B05	2030 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

**B10** Temporary extra bed (folding escort bed )

Name	Model	Full length	Full width	Height of the bed surface
Temporary extra bed (folding escort bed )	B10	1950 mm	800 mm	430 mm
ID length	The back lifting angle	Load bearing	ID width	
970 mm	260 mm	≥250kg	800 mm	

# Hospital bed ( B )

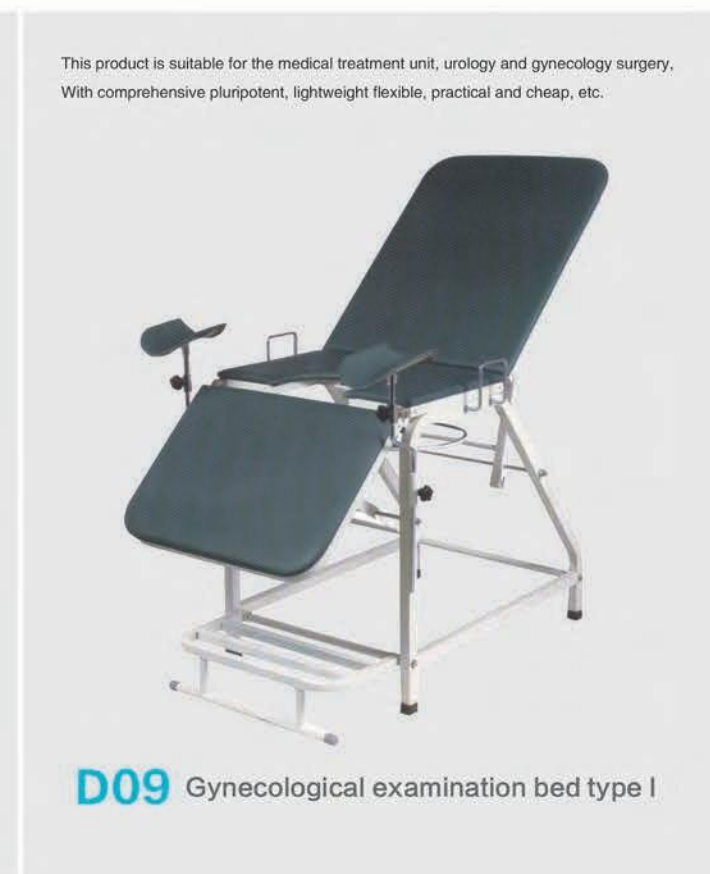

## B15 lash composite beds

Name	Model	Full length	Full width	Height of the bed surface
lash composite beds	B15	2090 mm	900 mm	550 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1950 mm	0-75°	0-45°	≥250kg	1250 mm

**Product features:**  
Head of bed、end of bed: ABS composite bed, built-in stainless steel pipe  
Constitution of bed surface: 20 \* 40mm square tube surface  
Guardrail: Plug-in barrier  
Casters: 125mm silent casters  
Cranks: metal fold hidden hand crank  
Optional: special wooden table, IV pole  
Load bearing: Load bearing≥250kg

## Maternal and child hospital bed

Love to caress Care with love

## Multi-function turn nursing bed

## C12 Linkage type health care bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Linkage type health care bed	C12	2030 mm	1000 mm	500 mm	1950 mm	0-75°	0-30°	≥250kg	900 mm

### Product features:

Head of bed、end of bed: Compressed wood or solid wood bed-head

Constitution of bed surface: 20 \* 40 square tube surface

Guardrail: Plug-in fence

Casters: Nil

Cranks: ABS fold hidden hand crank

Optional: Dedicated wooden dining table, IV pole, drawbar

Load bearing: Load bearing≥250kg

## C13 Linkage type health care bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Linkage type health care bed	C13	2030 mm	1000 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

Head of bed、end of bed: Compressed wood or solid wood bed head

Constitution of bed surface: 20 \* 40 square tube surface

Guardrail: Five column aluminum alloy guardrail or split type aluminum alloy

Casters: guardrail

Cranks: ABS fold hidden hand crank

Optional: Dedicated wooden dining table, IV pole, drawbar

Load bearing: Load bearing≥250kg

## C15 Solid wood bed-head with two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Solid wood bed-head with two-crank hospital bed	C15	2070 mm	1000 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

Head of bed、end of bed: Solid wood board bed head

Constitution of bed surface: Made of high quality cold-rolled overall steel plate stamping molding

Guardrail: Five column aluminum alloy guardrail

Casters: 125mmsilent casters

Cranks: ABS fold hidden hand crank

Optional: Dedicated wooden dining table, IV pole

Load bearing: Load bearing≥250kg

## C15-1 Household two-crank nursing bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
Household two-crank nursing bed	C15-1	2070 mm	1000 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

Head of bed、end of bed: Compressed wood bed head

Constitution of bed surface: Made of high quality cold-rolled overall steel plate stamping molding

Guardrail: Optional Five column aluminum alloy guardrail

Casters: 125mmsilent casters

Cranks: ABS fold hidden hand crank

Optional: Dedicated wooden dining table,IV pole

Load bearing: Load bearing≥250kg

## Maternal and child hospital bed

Love to caress Care with love

A04-2 ABS two-crank hospital bed

Name	Model	Full length	Full width	Height of the bed surface
ABS two-crank hospital bed	A04-2	2200 mm	960 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
2050 mm	0-75°	0-45°	≥250kg	900 mm

Product features:

Head of bed、end of bed: Advanced engineering plastic blow molding

Constitution of bed surface: Made of high quality cold-rolled steel plate stamping molding whole

Guardrail: Stainless steel column plus five column column (or six) aluminum guardrail

Casters: 125mm Luxurious central brake central control silent casters

Cranks: ABS fold hidden hand crank

Optional: Infusion stand, drainage hook, shelf

Load bearing: Load bearing≥250kg

## B02-6 ABS one-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS one-crank hospital bed	A02-6	2090 mm	960 mm	500 mm	1950 mm	0-75°	/	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** C model punching strip

**Guardrail:** Stainless steel column plus five column column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## A06-2 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	A06-2	2200 mm	1040 mm	500 mm	2050 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** ABS and stainless steel compound

**Constitution of bed surface:** C model punching strip

**Guardrail:** Stainless steel column plus five column column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## A12 ABS one-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS one-crank hospital bed	A12	2200 mm	1040 mm	500 mm	2050 mm	0-75°	/	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** Made of high quality cold-rolled whole steel plate stamping molding

**Guardrail:** Stainless steel column plus five column (or six) aluminum guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** stainless steel hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

## B04-6 ABS two-crank hospital bed

Product Name	Model	Overall length	Full width	Bed height	Inside diameter	Back lift angle	Leg lift angle	Bearing	Inside diameter
ABS two-crank hospital bed	B04-6	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** C model punching strip

**Guardrail:** Stainless steel column plus five column column (or six) aluminum alloy guardrail

**Casters:** 125mm Luxurious silent casters

**Cranks:** stainless steel hand crank

**Optional:** IIV pole, drainage hook, shelf

**Load bearing:** Load bearing≥250kg

**B11-3** Children's hospital bed

Name	Model	Full length	Full width	Height of the bed surface
Children's hospital bed	B11-3	1880 mm	860 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
1800 mm	0-75°	/	≥250kg	800 mm

**Product features:**  
**Head of bed, end of bed:** High quality steel pipe coating head of a bed  
**Constitution of bed surface:** 20\*40mm square tube surface  
**Guardrail:** Five column aluminum alloy guardrail  
**Casters:** optional  
**Cranks:** ABS telescopic hidden hand crank  
**Optional:** special wooden table, IV pole  
**Load bearing:** Load bearing≥250kg

## B06 ABS three-crank Hanging Leg orthopedic bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS three-crank Hanging Leg orthopedic bed	B06	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** Advanced engineering plastic blow molding

**Constitution of bed surface:** 20 \* 40mm square tube bed, the installation of single-arm drawbar

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm luxury silent casters

**Cranks:** Ordinary steel folding hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

## B09 ABS three-crank Hanging Leg orthopedic bed

Name	Model	Full length	Full width	Height of the bed surface	ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width
ABS three-crank Hanging Leg orthopedic bed	B09	2090 mm	900 mm	500 mm	1950 mm	0-75°	0-45°	≥250kg	900 mm

### Product features:

**Head of bed, end of bed:** ABS and stainless steel compound

**Constitution of bed surface:** 20\*40mm square pipe bed surface, with arms traction frame

**Guardrail:** Stainless steel column plus five column (or six) aluminum alloy guardrail

**Casters:** 125mm luxurious silent casters

**Cranks:** Ordinary steel folding hand crank

**Optional:** IV pole, drainage hook, shelf

**Load bearing:** Load bearing ≥250kg

B07 ABS three-crank Hanging Leg orthopedic bed

Name		Full length	Full width	Height of the bed surface
ABS three-crank Hanging Leg orthopedic bed		2090 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width

1950 mm	0-75°	0-45°	≥250kg	900 mm
---------	-------	-------	--------	--------

**Product features:**  
Head of bed、end of bed: Advanced engineering plastic blow molding  
Constitution of bed surface: 20 \* 40mm square tube bed,with complete setof stainless steel gantry traction frame  
Guardrail: Stainless steel column plus five column (or six) aluminum alloy guardrail  
Casters: 125mm luxury silent casters  
Cranks: Ordinary steel folding hand crank  
Optional: IV pole, drainage hook, shelf  
Load bearing: Load bearing≥250kg

B07-1 ABS three-crank Hanging Leg orthopedic bed

Name	Model	Full length	Full width	Height of the bed surface
ABS three-crank Hanging Leg orthopedic bed	B07-1	2090 mm	900 mm	500 mm
ID length	The back lifting angle	The leg lifting angle	Load bearing	ID width

1950 mm	0-75°	0-45°	≥250kg	900 mm
---------	-------	-------	--------	--------

**Product features:**  
Head of bed、end of bed: ABS and stainless steel compound  
Constitution of bed surface: 20 x 40 mm square pipe bed surface,with a completeset of aluminum alloy gantry traction frame  
Guardrail: Stainless steel column plus five column (or six) aluminum alloy guardrail  
Casters: 125mm luxurious silent casters  
Cranks: Ordinary steel folding hand crank  
Optional: IV pole,drainage hook,shelf  
Load bearing: Load bearing≥250kg

# B08 Stainless steel three-function hanging leg orthopedic bed

## 30A3

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability. anodizing aluminum frame, soft seat, hand brake, safety belt, fixed armrest and upturning footrest, foldable backrest.

## 30A5

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armrest, reversible footrest.

## 33A

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, with hand brake, fixed armrest, reversible footrest.

## 33A1

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, with hand brake, fixed armrest, reversible footrest.

## 3628C (Child)

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armrest, reversible footrest.

## 3628D (Child)

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, Height adjustable handle, with hand brake, fixed armrest, reversible footrest.

## 4612-2

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Steel coating frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armrest, reversible footrest.

## 4617-1

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Steel coating frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armrest, reversible footrest.

## 4618

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Steel coating frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armed, reversible footrest.

## 4619

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Steel coating frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armed, reversible footrest.

## 4635

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armed, reversible footrest.

## 4636-1

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armed, reversible footrest.

## 4636-5

frame adopts humanized design which makes the backrest fit the curve of human body, disperses the pressure efficiently and keeps the pressure uniform. detachable backrest and seat are made of air mesh fabric which has good breathability, Aluminum alloy frame, Surface anodic oxidation, Soft seat, folding handle, with hand brake, fixed armed, reversible footrest.

## WB501

Description: Electric folding wheelchair, liquid painted steel frame, quickly detachable battery box, flip up armrest, swing away footrest, double motor rear wheel drive, padded nylon upholstery, 8 inch front solid tires, 12 inch rear wheel with pneumatic tire or solid tire, with manual and automatic control switch and anti-tipper.

## WB602

Description: Electric folding wheelchair, liquid painted aluminum frame, quickly detachable battery box, flip up armrest, quick release footrest, double motor rear wheel drive, padded nylon upholstery, 8 inch front wheel, rear 12 inch wheel with pneumatic tire or solid tire, with manual or automatic control switch and anti-tipper.

## WB601

Description: Electric non-folding wheelchair, liquid painted steel frame, quickly detachable battery box, quickly removable footrest and armrest, double motor rear wheel drive, padded nylon upholstery, 8 inch front solid tires, 12 inch rear wheel with pneumatic tire or solid tire, with manual or automatic control switch and anti-tipper, adjustable backrest with unique shock absorber design.

## WB901

Description: Standing power wheelchair, front wheel drive, unique design with imported split type control, easy to operate, flip up armrest, power operated elevating legrest and reclining backrest, dual front motor, electro-magnetic brake, front 12" pneumatic tire, rear 8" pneumatic tire.

M01

Anti bed sore inflatable medical air mattress ---Wave model(Purplish Blue/Grey/Sky Blue)  
Size: 2000\*900mm

Function Introduction:

- ◆ Soft and comfortable after inflated
- ◆ The airway inflated circularly from 1,3,5.....airway, to 2,4,6.....airway. It could jet stream
- ◆ The mattress surface fluctuate, take the good advantages of ventilating and transferring the body force
- ◆ It have a comfortable urinal hole which is convenient for the patient and nurse person
- ◆ The mattress have the effect of preventing bed sore for long term using

- ◆ The airway inflated circularly from 1,3,5.....airway, to 2,4,6.....airway. It could jet stream
- ◆ The mattress surface fluctuate, take the good advantages of ventilating and transferring the body force
- ◆ It have a comfortable urinal hole which is convenient for the patient and nurse person
- ◆ The mattress have the effect of preventing bed sore for long term using

# M04

Anti bed sore inflatable medical air mattress----Special of stryker frame model(Purplish Blue)

# M04-1

Anti bed sore inflatable medical air mattress----Special of stryker frame model(Sky Blue)

M04-2

Anti bedsores inflatable medical air mattress---Special of stryker frame model(Purplish Blue)

M04-3

Anti bedsores inflatable medical air mattress---Special of stryker frame model(Sky Blue)

M05

Anti bedsores inflatable medical air mattress---Ball Wave model(Cream-coloured)

## F01 Full-elasticity of four in one

### Warm prompt:

Three cushions, exchange freely Four method of use  
 use alone, breathable  
 use with Bamboo charcoal cushion, moisture adsorption  
 use with warm cushion' keeping warm  
 use with self-heating cushion' emitting heat

## F02 Lumbar vertebra of four in one

### Warm prompt:

Three cushions, exchange freely Four method of use  
 use alone, breathable  
 use with Bamboo charcoal cushion, moisture adsorption  
 use with self-heating cushion, emitting heat  
 use with foam-rubber cushion, keeping warm

## F03 All-over stretch medical fixing belt (widening type)

### The function, structure and composition of product:

Fixing belt is made up of plastic plate, steel plate, knitted fabric, elastic fabric or canvas, artificial leather or leather, elastic tape, nylon tape, sponge rivet, retaining ring, thread gluing and other materials. According to the application of different parts can be divided into waist fixed belt, rib fixed belt, bust fixed belt, clavicle fixed belt, knee joint fixed belt, metacarpal joint fixed belt, ankle joint fixed belt, waist and abdomen fixed belt, forearm fixed belt, shoulder-elbow fixed belt, cervical vertebra fixed belt.

### Range of application:

Apply to the constraints of patients with fixed

**Model:** XL/L/M/S

## F04 All-over stretch medical fixing belt (curvature molding)

### The function, structure and composition of product:

Fixing belt is made up of plastic plate, steel plate, knitted fabric, elastic fabric or canvas, artificial leather or leather, elastic tape, nylon tape, sponge rivet, retaining ring, thread gluing and other materials. According to the application of different parts can be divided into waist fixed belt, rib fixed belt, bust fixed belt, clavicle fixed belt, knee joint fixed belt, metacarpal joint fixed belt, ankle joint fixed belt, waist and abdomen fixed belt, forearm fixed belt, shoulder-elbow fixed belt, cervical vertebra fixed belt.

### Range of application:

Apply to the constraints of patients with fixed

**Model:** XL/L/M/S

## F05 All-over stretch medical fixing belt {all-over stretch ventilate}

### The function, structure and composition of product:

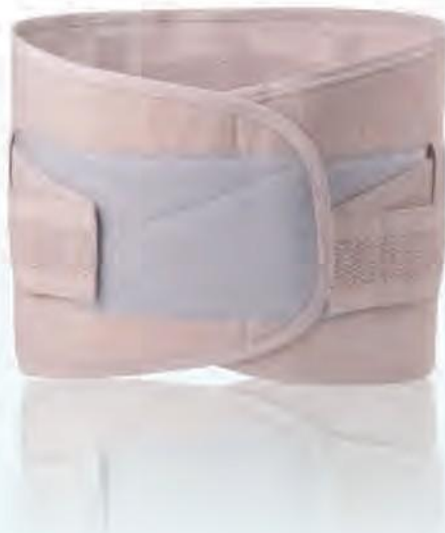

Fixing belt is made up of plastic plate, steel plate, knitted fabric, elastic fabric or canvas, artificial leather or leather , elastic tape, nylon tape, sponge rivet, retaining ring, thread gluing and other materials. According to the application of different parts can be divided into waist fixed belt, rib fixed belt, bust fixed belt, clavicle fixed belt, knee joint fixed belt, metacarpal joint fixed belt, ankle joint fixed belt, waist and abdomen fixed belt, forearm fixed belt, shoulder-elbow fixed belt, cervical vertebra fixed belt.

### Range of application:

Apply to the constraints of patients with fixed

**Model:** XII/M/S

## F06 All-over stretch medical fixing belt {all-over stretch ventilate}

### The function, structure and composition of product:

Fixing belt is made up of plastic plate, steel plate, knitted fabric, elastic fabric or canvas, artificial leather or leather , elastic tape, nylon tape, sponge rivet, retaining ring, thread gluing and other materials. According to the application of different parts can be divided into waist fixed belt, rib fixed belt, bust fixed belt, clavicle fixed belt, knee joint fixed belt, metacarpal joint fixed belt, ankle joint fixed belt, waist and abdomen fixed belt, forearm fixed belt, shoulder-elbow fixed belt, cervical vertebra fixed belt.

### Range of application:

Apply to the constraints of patients with fixed

**Model:** XII/M/S

## F07 Abdomen belt

### The function, structure and composition of product:

Fixing belt is made up of plastic plate, steel plate, knitted fabric, elastic fabric or canvas, artificial leather or leather , elastic tape, nylon tape, sponge rivet, retaining ring, thread gluing and other materials. According to the application of different parts can be divided into waist fixed belt, rib fixed belt, bust fixed belt, clavicle fixed belt, knee joint fixed belt, metacarpal joint fixed belt, ankle joint fixed belt, waist and abdomen fixed belt, forearm fixed belt, shoulder-elbow fixed belt, cervical vertebra fixed belt.

### Range of application:

Apply to the constraints of patients with fixed

**Model:** XL/L/M/S

## MC1 Medical square cushion

### The function ,structure and composition of product:

Medical Cushion is mainly made up of ninon PVC , PVC or rubber , process and charging connector, cloth cover , airway tube, plastic connector. inflatable ball or inflater.

## MC2 Medical round cushion

### The function ,structure and composition of product:

Medical Cushion is mainly made up of ninon PVC , PVC or rubber, process and charging connector, cloth cover, airway tube, plastic connector , inflatable ball or inflater.

## Self-heating protector

SP1 Lumbar protector(yellow)

SP2 Lumbar protector(black)

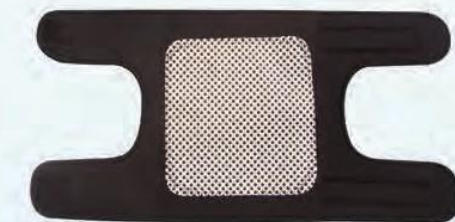

SP3 Lumbar protector(steel)

SP4 Shoulder

SP5 Knee joint protector

SP6 Elbow joint protector

SP7 Ankle joint protector

SP8 Cervical vertebra protector

SP9 Wrist protector

T03 Cervical vertebra tractor (half velvet)

**Description:**  
Cervical vertebra tractor is a kind of pneumatic tractor apparatus for the neck, It is mainly used for pneumatic on cervical spondylo- sis of never root type, Play a part in Relieve symptoms, It's easy to use, simplicity to operate & good in function, safe and effective.

Cervical traction data:

Before gasing ID	After gasing ID	Before gasing OD	After gasing OD	Deviation
8cm*13cm	10cm*14cm	24cm*27.5cm	23cm*26cm	±0.5

T04 Cervical vertebra tractor (full velvet)

**Description:**  
Cervical vertebra tractor is a kind of pneumatic tractor apparatus for the neck, It is mainly used for pneumatic on cervical spondylo- sis of never root type, Play a part in Relieve symptoms, It's easy to use, simplicity to operate & good in function, safe and effective.
